

Introduction

Welcome to the pdf-viewer component demo. This sample PDF showcases navigation, zoom, search, and thumbnail features. Try the toolbar controls above!

Navigation

Use the arrow buttons or keyboard arrows to move between pages. You can also type a page number directly into the page input field. Home and End keys jump to the first and last pages.

Zoom Controls

Zoom in and out with the magnifying glass buttons. Use Fit Width to fill the viewport horizontally, or Fit Page to see the entire page. Pinch-to-zoom works on touch devices.

Search

Click the search icon or press Ctrl+F to open the search bar. Type a query to find text across all pages. Use the arrow buttons to navigate between matches. The quick brown fox jumps over the lazy dog.

Theming

This component supports light and dark color schemes. It auto-detects the page theme or you can set `mode=dark` explicitly. CSS custom properties allow deep customization of colors, fonts, and spacing.
